Bangalore

in.linkedin.com/in/ishan-taunk-726b0119b

As a developer, I specialize in creating functional and aesthetic websites and web applications that are optimized for user experience.

EDUCATION

- B.Tech.(Hons)**
IIT(ISM) Dhanbad
06/2013 - 04/2017
Dhanbad
Courses
- Petroleum Engineering

WORK EXPERIENCE

- Front-end Developer**
Quantum
09/2022 - Present
Bangalore
Achievements/Tasks
- Designed the wireframes in **Figma** and developed a smooth UI workflow using **React** for installation of product via template by automating the factory installation process and making the whole process quicker and easier for customers.
- Added a feature to monitor health of all clusters in a single page so the user immediately gets notified if a server goes down.
- Added a feature which allows the user to add or remove multiple GPUs from the server using dropdown.
- Front-end Developer**
AIDETIC
06/2020 - 09/2022
Bangalore
Roles and Responsibilities
- To develop responsive web applications using **HTML5, CSS3, JavaScript, React** and **Angular** framework.
- To determine the structure and design of web pages.
- To strike a balance between functional and aesthetic design and to ensure web design is optimized for smartphones.
- To optimize web pages for maximum speed and scalability.
- To maintain brand consistency throughout design and build reusable code for future use.
- Mathematics Faculty**
Allen Career institute
02/2018 - 03/2020
Jaipur
Roles and Responsibilities
- Provide articulate description and solutions to mathematics questions pertaining to IITJEE and other relevant entrance examinations.
- To hone the analytical skills of students and provide problem solving strategies to students.

SKILLS

- React
- JavaScript
- CSS3
- HTML5
- Angular
- Typescript
- Tailwind CSS
- Redux Toolkit
- RxJS
- Jest

PROJECTS

- USP 5.0 (09/2022 - Present)**
 - To develop and maintain the product using **React**, and to improve user experience and performance.
 - To create cluster-monitoring page which can enable user to monitor all essential details of a cluster. Added **Debouncing** to the search functionality to reduce the number of API calls and make the UI faster.
- USP template Installation (03/2023 - Present)**
 - To design template installation workflow using **Figma** and make all pages design consistent to the product.
 - To create and maintain all the pages in the workflow using **React** and notify user of current progress in installation through constant polling of APIs.
 - To integrate node-add and node-replace feature in the template installation UI.
- 73 Strings (06/2021 - 09/2022)**
 - To design and maintain the AI related pages of the website using **Angular framework**.
 - To display various types of data using **Angular** Highcharts.
 - To add features which help the clients in uploading their documents and visualize the contained information in a simple manner.
 - To add features which help the clients in editing their data and save/download it in excel format.
- Contiq (03/2021 - 06/2021)**
 - To design and maintain various sections of Contiq website using **Angular framework**.
 - To add various functionalities in the product to make it more user friendly.
- Hiring bot (10/2020 - 02/2021)**
 - To make a hiring bot from scratch using **React** to inform users of all the new freelancing jobs using notifications.
- AIDETIC website (08/2020 - 11/2020)**
 - To maintain the company website and add additional features using **React Gatsby**.
