## Professional Summary

---

Senior Frontend Engineer with 5+ years of experience building high-traffic, customer-facing booking and enterprise platforms. Proven track record of improving conversion rates and system reliability through performance, robust state management and scalable component architecture.

## Skills

---

**Frontend:** ReactJS, NextJS, Angular, Redux, Tailwind CSS, Bootstrap

**Backend:** Node.js, Express, REST, GraphQL

**Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS

**Tools:** Git, NPM, Webpack, VS Code, Postman, Jira, Figma

**Testing:** Jest, React Testing Library

## Experience

---

### Senior Frontend Engineer

Bangalore, KA

Holiday Inn Club Vacations

Jan 2025 – Present

- Led frontend modernization with **React** and **NextJS**, improving performance, maintainability, and UX for a high-traffic, customer-facing booking platform.
- Reduced **booking failure rate from 35% to 17%** by redesigning error handling, improving session-timeout recovery and hardening edge-case flows.
- Owned the end-to-end **resort booking experience**, implementing promo codes, pagination and dynamic rate selection with **robust state management and edge case handling**.
- Improved **checkout success rate from 65% to 70%** by strengthening form validation, simplifying payment flows and reducing user friction.
- Built and maintained an **internal UI component library** using **Storybook** and **Rollup**, enabling consistent design and faster feature delivery across teams.
- Extended the **Contentstack CMS** with new content models and UI integrations, supported by unit tests in **Jest**.
- Collaborated closely with **UX, QA and backend teams** to streamline delivery, reduce rework and improve release predictability.

**Technologies:** React, Next.js, TypeScript, JavaScript (ES6 +), Storybook, Rollup, HTML5, CSS3, Agile

### Frontend Engineer

Bangalore, KA

Quantum Corporation

Sep 2022 – Dec 2024

- Designed and implemented a guided factory installation workflow - reducing manual setup steps by 60% - by translating **Figma** wireframes into a production ready UI adopted by enterprise storage customers.
- Built a **real-time monitoring dashboard** to track cluster health reducing mean time to detect server downtime by surfacing instant alerts across 50+ nodes for enterprise storage customers.
- Developed a scalable **GPU management interface**, enabling users to add or remove multiple GPUs through a streamlined, intuitive UI.

**Technologies:** React, Redux, JavaScript (ES6 +), HTML5, CSS3, Agile

### Frontend Engineer

Bangalore, KA

AIDETIC

Jun 2020 – Sep 2022

- Built document upload and interactive data visualization modules enabling analysts to explore and filter datasets of 100k+ records with sub-second render times, reducing manual reporting effort by 30%.
- Implemented data editing and Excel export functionality, enabling users to modify records and extract results for offline analysis.

**Technologies:** React, JavaScript (ES6 +), HTML5, CSS3

## Projects

---

### In-house UI Library

[github](#) 

- Created an in-house UI library, [ishan-ui-library](#) , featuring reusable components (e.g., button, modal), and published it on npm using **Rollup**.
- Used **Storybook** to develop React components in isolation and document usage for consistent adoption.
- **Tools Used:** React, Storybook, TypeScript, JavaScript, CSS

## Education

---

### IIT(ISM) Dhanbad

*June 2013 – April 2017*

*B.Tech. in Petroleum Engineering*

- GPA: 7.38/10.0
