About

A frontend developer with over 5 years of experience in designing, developing and implementing scalable and responsive enterprise level web applications that are optimized for user experience.

Skills

Frameworks/Libraries: ReactJS, NextJS, Angular, Redux, Tailwind, Bootstrap

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS

Tools: Git, NPM, Webpack, VS Code, Postman, Jira, Figma

Testing: Jest, React Testing Library

Education

IIT(ISM) Dhanbad

B.Tech. in Petroleum Engineering

- GPA: 7.38/10.0

June 2013 – April 2017

Experience

Senior Frontend Engineer

Holiday Inn Club Vacations

Bangalore, KA

Jan 2025 – Present

- Led front-end modernization with **React** and **NextJS** improving performance, maintainability, and user experience for high traffic, customer-facing application.
- Utilized **React**, **Typescript** and **SCSS** to improve the calendar feature by implementing new workflow to help the customer navigate smoothly through the resort booking flow.
- Fostered cross-functional collaboration accross UX, QA and engineering teams, boosting project delivery success rate by 40% and employee engagement by 50%
- Added new content types with properties in **Content Stack Management** system and integrated the corresponding data in UI along with test cases in **JEST**.

Technologies: React, Next.js, Cypress, JavaScript (ES6 +), HTML5, CSS3, Agile

Frontend Engineer

Quantum Corporation

Bangalore, KA

Sep 2022 – Dec 2024

- Created wireframes in **Figma** and developed a seamless UI workflow using **React** to streamline the product installation process. By automating the factory installation, I significantly enhanced the speed and ease of the process, providing a smoother and more efficient experience for customers.
- Implemented a feature that allows users to monitor the health of all clusters on a single page, providing instant notifications if any server goes down, ensuring quick awareness and response.
- Implemented a feature that enables users to easily add or remove multiple GPUs from the server through a user-friendly dropdown interface.

Technologies: React, Redux, JavaScript (ES6 +), HTML5, CSS3, Agile

Frontend Engineer

AIDETIC

Bangalore, KA

June 2020 – Sep 2022

- Added features using **React** that helped clients upload their documents and visualize the information contained in a simple way.
- Added features which helped clients edit their data and save/download them in Excel format.

Technologies: React, JavaScript (ES6 +), HTML5, CSS3

Projects

Video Streaming App

[github](#) 

- Created a high-performance video streaming app with intelligent search **debouncing**, ensuring seamless content discovery.
- Added real-time chat to every video with seamless interaction powered by constant **API polling**, ensuring an engaging and dynamic viewer experience.
- Tools Used: React, Redux, JavaScript, CSS
